

cooltex demo

$$\begin{cases} \dot{y} &= x^2 + x \\ y(0) &= 2 \end{cases}$$

This is how you write an ode with a single command

Just some text for reference...

Linear programming problem

This is a linear programming problem with a title:

$$\min_c \quad c^T x$$

s.t.

$$\begin{aligned} x &\geq 0 \\ AX &> b \\ CX &< d \end{aligned}$$

<MINTED>

Code inside a simplebox

You can easily remove shadow and rownumber

<MINTED>

You can wrap boxes!
